**DETAILED ACTION**

***Response to Amendment***

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121.
  - I. Claims 1-13, drawn to a method of sending a mobile phone short message via electronic e-mail, said method involving a user, which sends via e-mail server an electronic mail to a conversion mail server by which the e-mail data are converted to a short message recipe that is sent that is sent to a short message server from which the message is sent to a receiving end mobile phone; wherein said user end has a function of sending e-mail, entering the contents of the e-mail, and dispatching the e-mail to the sender mail server via internet etc., classified in class 709/206.
  - II. Claims 11-13 drawn to a cost transaction method using the method of sending the mobile phone short message by e-mail, said transaction method involving a user end which sends e-mail via the sender e-mail server to a conversion mail server which converts the e-mail information into a short message recipe that is sent to a short message server from which the message is sent to a designated receiving end mobile phone etc., classified in class 705/400 and 713/178.
2. The inventions are distinct, each from one another because of the following reasons:

Inventions I and II are related as mutually exclusive species in an intermediate-final product relationship. Distinctness is proven for claims in this relationship if the intermediate product is useful to make other than the final product (MPEP § 806.04(b), 3<sup>rd</sup> paragraph), and the species

Art Unit: 2157

are patentably distinct (MPEP § 806.04(h)). Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that is the case. In either instance, if the examiner finds one of the inventions anticipated by the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and the search required for Invention I is not required for Invention II, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 2157

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
